

JAMES OGUNLEYE

SOFTWARE DEVELOPER

Osun state, Nigeria | +2348127470107 | tunde200.james@gmail.com | [github](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Detail-oriented and innovative Software Developer with a strong foundation in designing, developing, and deploying scalable web and mobile applications. Proficient in full-stack development using technologies such as Django, React.js, JavaScript, HTML/CSS, and PostgreSQL. Experienced in building RESTful APIs, integrating third-party services, and implementing secure user authentication systems.

Capable of managing the entire development lifecycle — from requirements gathering and system architecture to testing, deployment, and maintenance. Known for writing clean, maintainable code, solving complex technical challenges, and delivering high-quality software on time.

Projects: Peer-to-Peer Transport Booking Platform

Role: Full-Stack Developer

Tech Stack: Django REST Framework, PostgreSQL, React.js, Tailwind CSS, JWT, PostgreSQL, Git

Date: May 2025 – Present

Description:

Designed and implemented a full-stack web application enabling passengers to book rides with drivers traveling internationally or domestically. Developed backend RESTful APIs for user authentication, booking flow, and email notifications using Django REST Framework and PostgreSQL.

Key Features:

- **Authentication System** with signup, login, and JWT-based access control
- **Driver Travel Plan Management** allowing drivers to create travel plans
- **Passenger Booking Flow** where users can request a ride with form validation
- **Email Notification System** to send booking confirmations and approval status
- **Frontend Integration** with React.js and Tailwind CSS to match modern UI design
- **Role-based logic** for Drivers vs Passengers (UI & backend separation)

- **Protected Routes** using React Router and token-based authentication

Outcome:

Built a scalable foundation for a real-time ride-matching platform with integrated email notifications, deployable as either a web or WhatsApp-based tool.

SKILLS & COMPETENCY

Programming Languages

- Python, JavaScript, SQL, HTML/CSS, Bash, R

Web Development

- Django, Django REST Framework, React.js, Node.js, Express.js, Tailwind CSS, Bootstrap
- RESTful API design and integration
- User authentication (JWT, session-based, email/phone verification)

DevOps & Deployment

- Git, GitHub, CI/CD pipelines
- Docker basics, Heroku, Railway, Vercel
- Cloud platforms: AWS (basic usage), Firebase

Soft Skills

- Strong analytical thinking and problem-solving ability
- Clear and effective communication (written and verbal)
- Fast learner and adaptive to new technologies
- Collaboration and teamwork across technical and non-technical stakeholders

EDUCATION: Bachelor of Engineering(Electrical Engineering) EKITI STATE UNIVERSITY ADO EKITI : 2019 - 2025
